PIEDRA DE CORONACIÓN SAHARA

- El aspecto de piedra ligeramente esponjosa soporta los caprichos del clima sin dañarse.
- La piedra de coronación Sáhara se elabora a partir de materiales naturales, por lo que no podemos garantizar la evolución de los colores que pueden aparecer en el tiempo, de la misma forma que sobre las piedras en un medio natural. Estos diferentes matices le dan un encanto particular a la piedra reconstituída.
- La línea Sáhara es, de entre las líneas clásicas, una de las más completas con numerosas posibilidades de instalación.
- Servimos las losas y coronamientos Sáhara en color amarillo arena.

- O aspecto de pedra ligeiramente esponjosa suporta os caprichos do clima sem se danificar.
